Proudly providing high-quality products to clients throughout North America

East Jordan Plastics is a family owned business. We thank our dedicated employees and our loyal customers for all their years of support.

Our goal is to earn your business each and every season. We strive to meet your individual needs when it comes to production timing, product quality and delivery efficiency.

To that end, we develop an interactive relationship with all our customers that fosters an open dialog.

We still believe in good old-fashioned hard work, and we continue to thrive by producing high quality products and by offering the best personal service in the industry.

Bryan Diller, Scott Diller, Katie Doran, Cal Diller, Matt Diller and Nathan Diller

To Our Valued East Jordan Plastics Customers,

Three generations ago, our founders Ken and Shirley Diller settled in East Jordan, Michigan because of the natural abundance of cedar trees needed to produce wooden greenhouse flats. The company operated under the name of East Jordan Box and Crate Co. until the mid-1960's. As the company transitioned to manufacturing trays and inserts from wood to plastic material, the name was changed to East Jordan Plastics, Inc. Our name has been recognized in the industry as a quality container manufacturer for more than 70 years.

Throughout the years, we have never forgotten our roots and efforts in being 100% dedicated to the horticulture industry. We have grown into a multi-facility manufacturing company, while focusing on continued investment in our employees, technology and closed loop recycling. We are excited by the opportunity to serve our customers and the industry as a whole, and it is our ultimate goal to continue as long as plants need containers.

We wouldn't be where we are without the dedication of our employees, and ultimately your loyalty to East Jordan Plastics, Inc.

Thank you for Growing with us for over 70 years!

The Diller Family

Why is East Jordan Plastics the best company for you?

1 What We Offer

East Jordan Plastics is one of the largest Horticultural Thermoformers and Injection Molded Manufacturers in the country, offering a growing selection of Shuttle Pot® flower pots, Shuttle Tray® flower trays, plug and propagation trays, flats, inserts, web trays, hanging baskets and decorative planters.

2 Our Personal Approach

Three generations of the Diller family and many dedicated employees have made East Jordan Plastics what it is today. Our success has been achieved through a combination of loyal customers, consistently high-quality products, personal service, and good old-fashioned hard work.

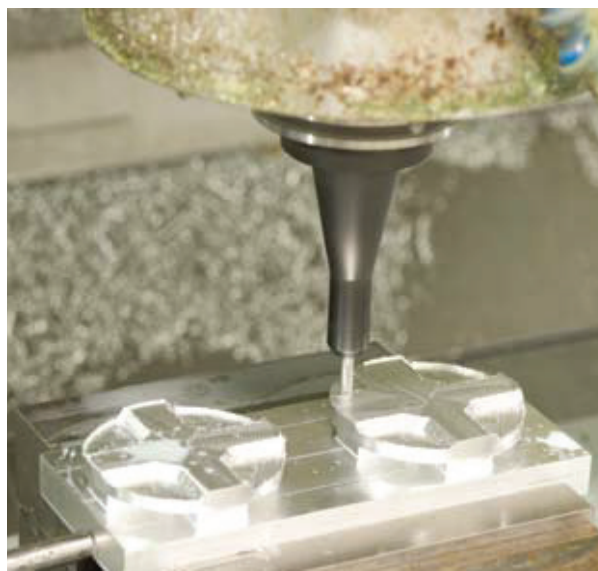

3 How We Meet Your Needs

Our three manufacturing facilities, located in East Jordan, Beaverton and South Haven, Michigan, include the most up-to-date thermoforming and injection molding equipment and technology. The three plants give us significant manufacturing capacity as well as considerable space for raw material and finished product. South Haven also houses our state-of-the-art recycling facility that can recycle over 15 million pounds of material annually.

4 Our Standard Of Care

Our thermoforming molds and tools are designed, engineered, and produced in-house on the latest computer-driven equipment. This allows us to control the tooling production process, ensuring the timely delivery of new products and the highest degree of quality and consistency.

5 Our Packaging

Today most of our product is shipped bulk on pallets. However, product is also packaged in corrugated cartons, corrugated sleeves, and plastic bags. We usually can accommodate special packaging requests.

7 How We Help Grow Your Sales

We offer up to 8-color offset printing and adhesive labeling, as well as graphic design services to help you create branding and merchandising programs that can grow business.

8 Our Recycling Program

Our commitment to recycling impacts your waste removal costs, significantly reduces the amount of plastic going to landfills, and shows your customers that together we are concerned about the environment.

6 Our Commitment To Product Development

We are constantly refining our products and processes to benefit growers. In addition, we actively seek grower input to jointly design and bring new products to market.

9 Our Delivery Record

Our own fleet of East Jordan Plastics trucks and several reliable carriers allow us to control delivery schedules and make sure your order arrives on time. Our veteran drivers know many of our customers personally.

The East Jordan Plastics Recycling Program

Project 100%

Responsibly Green

CLOSED LOOP RECYCLING

Reuse

Containers are manufactured from recycled plastic.

Reduce

Reduce the volume of plastic in landfills while saving on waste removal fees.

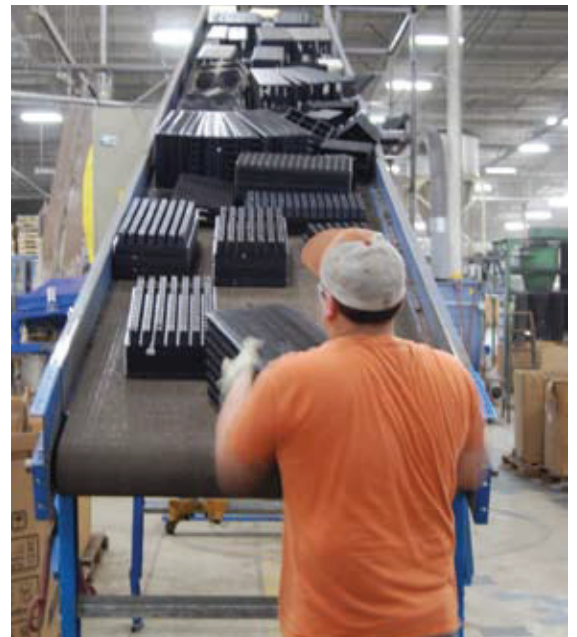

Recover

Used containers are recovered from greenhouses or post-consumer level.

Recycle

Containers are recaptured for reuse by growers or processed into regrind for manufacturing new containers, closing the loop.

We want your
used plastic
growing
containers.

It's Easy to Recycle with East Jordan Plastics

We recycle PS, PP and HDPE

- Knock your containers free of residual soil to allow for nesting.
- Containers do not have to be cleaned.

Please separate material by type

- Polystyrene: labeled with #6
- Polypropylene: labeled with #5
- High Density Polyethylene: labeled with #2

Palletize material

- Nest like-containers together and strap or wrap
- Nest products 90"-100" tall for single pallets or up to 48" for double stacking pallets.

Pick-up

- Truckload quantities are ideal. LTL quantities can be arranged.
- We can easily coordinate pick-ups with deliveries of finished product.
- EJP will also accept deliveries of used horticulture containers to our South Haven facility.

Our Commitment to Recycling

East Jordan Plastics (EJP) has been a recycler of plastic since the early 60's when we first began thermoforming plastic flats and inserts. Even then we realized the importance of recycling.

Today EJP has engineered and implemented a "closed loop" recycling process that uses proven technology and that ensures maximum energy efficiency and quality products. The first processing line of our 130,000 square foot facility in South Haven, Michigan has the capacity to recycle over 15 million pounds of material annually. Other lines will be added as needed.

At EJP we strongly believe that the best way to achieve sustainability is to recycle and reuse what we manufacture. With this in mind, it is our position that the most sustainable growing container is one made from recycled plastic.

Advantages of Recycling Plastic Horticultural Containers

- Recycled plastic containers can recover upwards of 60% of the energy put into processing the product initially.
- The recycling "closed loop" for plastic containers is repeated each time the material is recycled with significant energy recovery gains.
- Horticultural containers avoid landfills and are returned directly to our manufacturing stream.

Benefits to Growers and Retailers

- Reduce waste removal fees by keeping containers out of dumpsters and landfills
- Enhance your public image as a wise steward of the environment by using sustainable plastic growing containers
- Assist EJP with securing valuable recycled raw material and helping control input costs
- Create opportunities for selective containers to be reused
- Increase foot traffic as consumers return their containers to your garden center
- Attract new customers from non-participating retailers
- Achieve a better sustainable footprint due to trash reduction

SHUTTLE™ Hanging Baskets, Planters & Injection Molded Pots

The full featured quality injection molded SHUTTLE™ Basket and SHUTTLE™ Planter lines are all Made in the USA.

Our 10", 11" and 12" Baskets have multiple hanging options; over the rim for automation (10" and 11" only), and double clip and wire hanger holes.

10" Baskets available in New Diamond & Dune patterns.

3-Strand Hangers available for the 10" and 11" baskets; 4-Strand Hangers available for the 12" basket.

Tag slots integrated in rim.

Our 10", 12", New 13" and 14" Planters have sturdy construction with heavy rims and sidewalls with bottom slots for use with industry standard saucers.

Our 8" and 10" Injection Molded pots have strong rims that accept both hangers and our SPI cages. In combination with the cages, these containers work great for Poinsettia, Mum and Nursery crops that need plant support.

Set your plants apart with labeling
and high impact graphics

**Our 8-color printing capability
will help retailers sell out faster
and re-order sooner!**

Move Product Faster and Build Brand Loyalty

Printing helps move product. It builds brand recognition and makes your product stand out among others in the garden center. East Jordan Plastics can make your varieties be distinctive.

Cost-effective Process With Spectacular Results

Our new digital print plate technology, combined with our 8-color print capability, offers you an economical alternative to other forms of high resolution printing and labeling.

SHUTTLE POT® Flower Pots

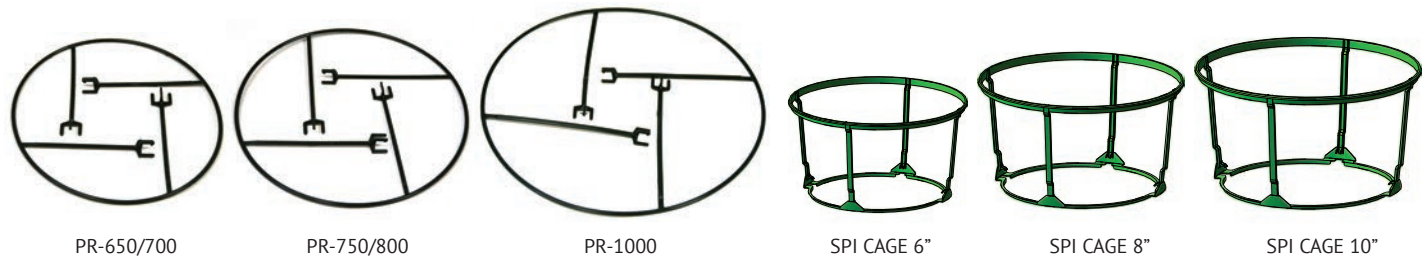

Custom colors available, contact us for a quote.
(See p. 50 for Color Guide)

With sturdy rims and shoulders for quick de-nesting and dispensing, not to mention extra strength and stability, we’ve designed our SHUTTLE POT® flower pots to move more plants, more quickly.

Our co-extruded pots feature a dark inner layer that prevents light from harming delicate roots. Our Dual-level drain holes and footed bottom design facilitate better drainage and a smooth, seamless finish facilitates easy plant removal. While outside, a boldly colored exterior adapts easily to both printing (round pots only) and labeling for that extra edge that can create flyoff-the-shelf sales appeal.

SHUTTLE TRAY® Flower Trays

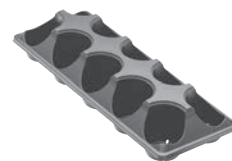

Worry-free shipment combines with fast and easy sales setup – not to mention the encouragement of multi-pot sales! Our sturdy SHUTTLE TRAY® flower trays and pot carriers anchor pots securely during transport from bench to rack to truck. The unique design makes it impossible for soil to fall between the growing pots. Multi-compartment plant trays facilitate fast display breakdown and setup, as well as attractive spacing of large-canopied crops. In addition, multiple holes ensure adequate drainage. East Jordan Plastics is the only source for SHUTTLE TRAY® flower trays.

SHUTTLE™ Squares

Like our SHUTTLE POT® flower pots, our SHUTTLE™ squares are designed to withstand whatever the grower world dishes out. They have the same strong rims and sturdy shoulders for quick de-nesting and trouble-free use in automated systems, a smooth, seamless finish to make plant removal a snap, and can be labeled.

Plug and Propagation Trays

Plug Trays

Our plug and propagation trays are precision-engineered to exact tolerances. Whether you need to hand-stick rooted cuttings, or sow millions of seeds using the latest automated equipment, we can offer you the levels of consistent precision and repeatable performance you need. At EJP, our trays:

Include round, square, hexagonal, and octagonal cells, vented and non-vented designs

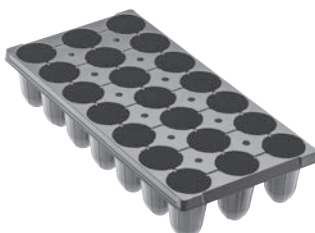

Include common element (CE), endless-thermoformed, vented or non-vented, precision punched, precision trimmed and soil saver version features

Have uniform wall thickness that provides strong corners and bottoms

Are designed for easy de-nesting

A Series Flats and Inserts

A Series Flat (10 7/8" x 21 1/4")

Our largest footprint flat and insert system, measuring 10 7/8" x 21 1/4". All A Series inserts have a variety of compatible A Series flats to meet any planting requirement, including Press-Fit square pots, and feature the following for greater efficiency and yield:

Instant two-finger de-nesting, insert after insert

Consistent cell thickness, producing uniform strength throughout the entire insert and preventing a paper-thin bottom

Easy pack separation, due to clean and consistent trim with precise serrations

Uniform drainage holes and channels for complete and even drainage of the cell

T Series Flats and Inserts

T Series Flat (10" x 20")

T Series, or "true" flats and inserts, utilize a space-saving 10" x 20" footprint. However, they have virtually the same soil volume as the A Series insert, because the T Series inserts are a full $\frac{3}{8}$ " deeper. The result is more flats per bench, cart, truck and retail facing.

- Using attention-grabbing tags in the built-in tag slot is an excellent way to display information to the retail customer or highlight programs

S Series Flats and Inserts

S Series Flat (8 1/2" x 20")

The S Series has an 8 1/2" x 20" footprint. To support the inserts, S Series flats have matching full-height support ribs to withstand the rigors of automation from transplanting to shipping. Another advantage of the S Series is the ease of labeling it offers to price and identify your crop.

L Series Flats and Inserts

L Series Flat (7 1/2" x 20")

The L Series offers a 7 1/2" x 20" footprint. The L 6-06H LS insert is an excellent way to save space and accepts an adhesive label. We produce a special-sized insert for the LF 6 and LF 10 flats. They are the C 6-06H and the C 10-04H LS, which measure 7 3/4" x 20". The high center rib in these flats improves stacking strength.

G Series Flats & Inserts (7" x 21")

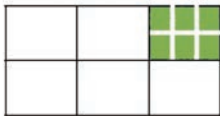

With its 7" x 21" footprint, the G Series is a space-saving design with several insert and pot options. The G 6-06H LS and G 6-06EH LS provide two soil volumes while maintaining a label-friendly sidewall. The G 12-01H insert may be used as a two-row sheet-of-pots system with the GF 4-12 flat. The A4 Press-Fit pots may also be used with the GF 4-12 flat, making an attractive retail presentation.
